DESCRIPTORS: Materials. Dielectric properties,
Measurement, Temperature, *Waveguides,
*Dielectrics.

The present report discusses the short-circuiting and idling method in the waveguide for the purpose of determining the dielectric properties of materials on a wave with a length of 3.2 cm in the temperature range of 20 to 200°C. Formulas are supplied for the calculation of the dependence of some high molecular substances and materials. (Author)
